

NEW WORLD TECHNOLOGY

YOUR ONE-STOP SOURCE

Fewer vendors means—you save money. Audio, Video, Lighting, and more are all connected. Coordination of these systems is a must.

SERIOUS ABOUT SERVICE

That means asking the right questions, listening carefully and responding quickly to your needs. At Phillips, you'll work with highly motivated and experienced people who will put your needs first.

VERSATILE

We work with facilities of all sizes and shapes in a wide variety of industries. This wide range of experience means increased versatility that works for you.

MORE THAN JUST PRODUCT

Phillips realizes that the overall success of your system is related to proper training and education of you and your staff.

BEST PRICE GUARANTEE

Some may think the big box store or the internet has the best price and availability. We're here to tell you that's not true. Due to our large sales and low overhead we guarantee you the lowest price.

TOP OF TECHNOLOGY

In today's fast-paced world, it's essential to keep up with technology driven solutions.

CUSTOM SOLUTIONS

We are experienced problem solvers who can help you surpass your expectations. You can depend on us to analyze your system needs and recommend and install quality custom products.

A LOCAL COMPANY

Although we have completed some of the largest projects in a tri-state area, we are a local company supporting the local economy. With best price guarantee, service and experience, why go anywhere else? We're here when you need us most.

"Our focus is to provide our customers with quality service, products and expertise so they may grow in their endeavor."

Dennis Phillips, President
Phillips Pro Systems

We were very happy with Phillips Pro from beginning to end on the project. Their planning, their execution of the plan, and overall cost was very positive for us. We would definitely use Phillips Pro Systems again and expect to in the future.

Don Benoit
Director of Music and Worship
Westgate Chapel Church
Toledo, Ohio

AUDIO

Phillips uses the latest technology for sound system design and tuning. *EASE* is a 3D software modeling program used for proper speaker selection and location. This program allows us to build a model of your facility, specify the proper materials for your ceiling, walls, and floor. Different scenarios can then be run to achieve the best choice in sound systems. We can calculate and eliminate dead spots up front and achieve equal coverage throughout your facility. The latest software is also used for tuning the sound system after installation. This allows us to adjust the sound system to produce the most desirable flat frequency response.

VIDEO BROADCAST

Video/broadcast is a growing priority for religious facilities. Phillips can help you choose the right equipment for the job, dependant on your level of skill and budget. Broadcast commercial cameras are an area where Phillips Pro Audio/Visual may save you time and money. When you first begin production, we will incorporate a system that may be expanded and will grow with your church, avoiding the purchase of any unneeded equipment later. For the seasoned pro, we appreciate your knowledge and experience and welcome the opportunity to work with you as well.

VIDEO PROJECTION AND DISTRIBUTION

Phillips offers and installs the finest and most complete line of front and rear projection systems. We want to help you incorporate these systems into the most effective presentation possible. Planning a projection system involves several steps: choosing the right screen size, viewing surface, projection brightness, and control system. Allow Phillips' professional staff to help achieve your goals.

LIGHTING

Phillips understands the need for present day lighting in many different styles of facilities. Religious facilities need complete lighting control at their finger tips in today's market. They have expanded to multi-purpose venues-for worship, concert, and theatrical along with many others. Digital lighting systems have more flexibility in today's changing times, giving us the flexibility for all occasions with simple, push button selections. Traditional and more modern lighting fixtures, both fill the needs of today's stringent specifications for efficient lighting.

SURVEILLANCE

Phillips understands the need for securing your facility and has the experience and knowledge to do it well. There are many growing technologies in this area that have made monitoring and control both easy and convenient. With technology comes cost effective solutions, and Phillips can walk you through step by step, expanding your understanding so you can make better choices to secure your facility.

PORTABLE CHURCH SOLUTIONS

Phillips can help you with pre-launch planning, creating your image, equipment choices and follow through with after launch tuning. We offer a wide variety of Portable Sound, Video, Lighting, Staging, Signage solutions and more that will save you time for more important things. Let us build a complete package for your specific needs that is easy to set up with step by step instruction and color codes. Everything a church on the grow needs can be found at Phillips.

ACOUSTICAL SOLUTIONS

The challenge of on existing facility is a specialty of Phillips. We can also consult with you on the acoustics of your facility before it is constructed. We use the latest software technologies to choose material for your room. The solution is not just to add absorbent material to reduce reverb. It is our goal to reduce reverb by frequency selection. We want to achieve a nice even sound, not too many highs and not too many lows. A well balanced room communicates most effectively.
